

SHOULDER RECONSTRUCTION

CHARLES S. NEER II

Illustrated by Robert J. Demarest

Contents

CHAPTER 1

Anatomy of Shoulder Reconstruction	1
Shoulder Movement	1
Initial Investigation of the Shoulder and Neck	14
Scapulothoracic Function	21
Glenohumeral Joint	24
The Upper Extremity Unit	31
Shoulder Motion Necessary for Function	32
Principles of Shoulder Incisions	32
Principles of Approaches to the Glenohumeral Joint	33
Rotator Interval	35
Avoiding Nerve Injuries	35

CHAPTER 2

Cuff Tears, Biceps Lesions, and Impingement	41
Classification and Pathomechanics of Impingement	44
Pathology of Outlet Impingement	54
Tears of the Rotator Cuff	63
Pathology of Impingement Lesions of the Biceps	70
Author's Anatomical and Surgical Data	73
Diagnosis of Outlet Impingement Cuff Tears and Biceps Lesions	77
Treatment of Impingement Lesions	93
Treatment of Impingement Lesions of the Biceps	134
Arthroscopy in the Treatment of Outlet Impingement	137
Treatment of Non-outlet Impingement Lesions	138
Calcium Deposits Are Not Primarily Impingement Lesions	142

CHAPTER 3

Glenohumeral Arthroplasty	143
Design	146
Clinical Assessment of Shoulder Arthroplasty	160
Alternatives to Replacement Arthroplasty	161
Appraisal of Glenohumeral Arthritis	163
Selection of Implant	168
Technique According to Pathology	169

Avascular Necrosis of the Humeral Head	194
Glenohumeral Osteoarthritis	202
Arthritis of Dislocations	208
Rheumatoid Arthritis	212
Old Trauma	222
Cuff-Tear Arthropathy	234
Congenital Defects of the Glenohumeral Joint	238
Arthritis of Erb's Palsy	243
Shoulder Arthroplasty After Infection	246
Reconstruction After Proximal Humeral Neoplasms	249
Arthroplasty After Glenohumeral Fusion	253
Revision Arthroplasty	255
Results of Nonconstrained Shoulder Arthroplasty	262
Commentary on the Literature and on Radiolucent Lines	269

CHAPTER 4

Dislocations	273
Glenohumeral Instability	274
Overall Assessment of Instability	280
Treatment of Initial Dislocations	298
Surgical Repair for Recurrent Anterior Dislocations	300
Surgical Repair for Recurrent Posterior Instability	309
Inferior Capsular Shift for Inferior and Multidirectional Instability	316
Special Instability Problems	327
Re-operation for Failed Repairs	336
Acromioclavicular Joint	341
Sternoclavicular Joint	355
Dislocation of the Clavicle	362

CHAPTER 5

Fractures	363
Fractures of the Upper Humerus	364
Fractures of the Proximal Humeral Epiphyseal Plate	399
Fractures of the Clavicle	403
Fractures of the Scapula	412
Gunshot and Propeller Injuries	420

CHAPTER 6

Less Frequent Procedures	421
Frozen Shoulder	422
Calcium Deposits	427
Acromioclavicular Arthritis	433
Sternoclavicular Arthritis	436
Glenohumeral Arthrodesis	438
Glenohumeral Resection	442

Treatment of Glenohumeral Infection with Bone Involvement	442
Glenoidectomy	442
Rotational Osteotomy of the Humerus	444
Reconstruction for Loss of the Deltoid Muscle (Deltoidplasty)	445
Neurological Conditions	446
Tumors of the Shoulder	458
Rare Shoulder Lesions	478
Scapular Pain	482

CHAPTER 7

Shoulder Rehabilitation	487
Rules of Shoulder Rehabilitation After Surgery	488
Full Exercise Program	491
Exercises to Regain Motion	495
Exercises to Restore Strength	515
Learning How to Raise the Arm Overhead	522
Strengthening Exercises Against Instability and Impingement	527
Late Aftercare	530
Limited Goals Exercise Program	530
Rehabilitation of the Shoulder in a Brace	533
Rehabilitation of the Shoulder When the Lower Extremities Are Nonfunctioning	533
Shoulder Exercises in Sports	533
References	535
Index	543
