ARTHROSCOPIC SHOULDER ANATOMY

Pathologic and Surgical Implications

CONTENTS

Acknowledgements	x
Preface	xi
Dedication	xii

1. Shoulder Anatomy and Surgical Technique	1
Materials and Methods	3
Surgical Environment	5
Posterior Portal	5
Anterior Portal	12
Superior Portal	16
Alternate Anterior Portal	18
Relationship to Brachial Plexus	18
Multiple Portal Diagnostic Arthroscopy	20

2. Biceps and Subscapularis Tendons	21
Tendon of the Long Head of the Biceps	23
Subscapularis Tendon	31

3. Glenohumeral Capsular Ligaments	35
Anterior Capsular Anatomy	37
Inferior Glenohumeral Ligament	37
Middle Glenohumeral Ligament	41
Superior Glenohumeral Ligament	44
Subscapularis Bursa	50
Contrast with Open Surgical Observations	55
Posterior Glenohumeral Capsule	57
Pathological Findings in Traumatic	
Recurrent Anterior Dislocations	61
Pathological Findings in Traumatic	
Recurrent Anterior Subluxation	64
Pathological Findings in Posterior Subluxation	
or Dislocation	68
Degenerative Arthritis	68

4. Glenoid Labrum	69
Labral Anatomy	74
Biological Aging of the Labrum	85
Clinical Significance of Labral Anatomy	85
Labral Pathology	85

5. Articular Surface and Synovial Membrane of the Glenoid and Humeral Head	91
Anatomy	93
Arthroscopy	93
Pathology	98

6. Rotator Cuff	103
Anatomy	105
Arthroscopy	106
Pathology	108
Frozen Shoulder	111

7. Subacromial Bursa	115
Anatomy	117
Endoscopic Technique	118
Subacromial Endoscopy	125
Pathology	128

8. The Acromioclavicular Joint	131
Anatomy	133
Arthroscopy	133
Pathology	137

9. Future Surgical Considerations	139
