| <i>Chapter</i>                                     | <i>Page</i> |
|----------------------------------------------------|-------------|
| Preface                                            | vii         |
| Acknowledgements                                   | ix          |
| <b>1. General Survey</b>                           | 1           |
| 1. Distal Radioulnar Level                         | 1           |
| 2. Proximal Carpal Level                           | 1           |
| 3. Capitate Head Level                             | 2           |
| 4. Distal Carpal Level                             | 3           |
| 5. Carpometacarpal Transition Zone                 | 4           |
| 6. Basimetacarpal Level                            | 5           |
| 7. Proximal Metacarpal Level                       | 6           |
| 8. Midmetacarpal Level                             | 6           |
| 9. Distal Metacarpal Level                         | 7           |
| 10. Metacarpophalangeal Transition Zone            | 7           |
| 11. Proximal Phalangeal Level                      | 8           |
| 12. Proximal Interphalangeal Level                 | 8           |
| 13. Middle Phalanx Level                           | 9           |
| 14. Distal Interphalangeal Level                   | 10          |
| 15. Third Phalanx Level (Tuberosity)               | 10          |
| <b>2. Carpal Area</b>                              | 11          |
| 1. Observations on the Carpal Area Proper          | 11          |
| 2. Carpometacarpal Transition                      | 27          |
| Discussion                                         | 29          |
| Summary                                            | 32          |
| <b>3. The Midhand</b>                              | 33          |
| 1. The Proximal Midhand Area                       | 33          |
| 2. Separate Columns of the Midhand                 | 37          |
| <i>The Thenar Compartment (Series no. 1899)</i>    | 39          |
| <i>Discussion of the Thenar Compartment</i>        | 42          |
| <i>The Hypothenar Area (Series no. 1452)</i>       | 43          |
| <i>The Hypothenar Area (Series no. 1899)</i>       | 45          |
| <i>The Hypothenar Area (Series no. 1234)</i>       | 46          |
| <i>Discussion of the Hypothenar Area</i>           | 47          |
| <i>Palmar Interossei</i>                           | 48          |
| <i>Palmar IV</i>                                   | 48          |
| <i>Palmar III</i>                                  | 49          |
| <i>Palmar II</i>                                   | 50          |
| <i>Summary Palmar Interossei (Series no. 1452)</i> | 51          |
| <i>Palmar IV</i>                                   | 51          |
| <i>Palmar III</i>                                  | 52          |
| <i>Palmar II</i>                                   | 52          |
| <i>Summary Palmar Interossei (Series no. 1899)</i> | 52          |
| <i>General Discussion of Palmar Interossei</i>     | 53          |
| <i>General Summary of Palmar Interossei</i>        | 53          |
| <i>Dorsal Interossei</i>                           | 54          |

|                                                                                                |         |
|------------------------------------------------------------------------------------------------|---------|
| <i>Dorsal IV</i>                                                                               | 54      |
| <i>Dorsal II</i>                                                                               | 57      |
| <i>Dorsal III</i>                                                                              | 58      |
| <i>Dorsal I</i>                                                                                | 60      |
| <i>General Discussion of Dorsal Interossei</i>                                                 | 61      |
| <i>General Summary of Dorsal Interossei</i>                                                    | 62      |
| <b>3. The Distal Midhand Area</b>                                                              | 63      |
| Discussion                                                                                     | 70      |
| Summary                                                                                        | 74      |
| <i>Cross-sections of 'The Midhand'</i>                                                         | 75      |
| <br><b>4. The Subcutaneous Hypothenar Space</b>                                                | <br>147 |
| Series No. 1234                                                                                | 147     |
| Series No. 1899                                                                                | 158     |
| Discussion and Conclusions                                                                     | 173     |
| Summary                                                                                        | 177     |
| <br><b>5. Fibrous Constitution of the Finger</b>                                               | <br>179 |
| 1. The Free Finger                                                                             | 179     |
| 2. The Metacarpophalangeal Region                                                              | 216     |
| Discussion                                                                                     | 223     |
| Summary                                                                                        | 226     |
| <br><b>6. Frontal and Sagittal Series</b>                                                      | <br>227 |
| Series No. 1280                                                                                | 227     |
| Series No. 2118                                                                                | 239     |
| <br><b>7. Microdissection</b>                                                                  | <br>264 |
| 1. The Ulnar Approach                                                                          | 264     |
| <i>Exploration of the Subcutaneous Hypothenar Area</i>                                         | 264     |
| <i>Dissection 1</i>                                                                            | 264     |
| <i>Dissection 2</i>                                                                            | 266     |
| <i>Dissection 3</i>                                                                            | 271     |
| <i>The Hypothenar Muscular Compartment including the Ulnar Nerve and Artery</i>                | 273     |
| <i>The Hypothenar Muscular Area</i>                                                            | 274     |
| <i>Summary of the Ulnar Approach</i>                                                           | 275     |
| 2. The Radial Approach                                                                         | 277     |
| 3. The Palmar Approach                                                                         | 278     |
| <i>The Palmar Triangle</i>                                                                     | 278     |
| <i>The Webspace</i>                                                                            | 283     |
| <i>The Palmar Side of the Finger</i>                                                           | 285     |
| 4. The Dorsal Approach                                                                         | 285     |
| <i>Dorsal Aspect of the Forearm and Hand</i>                                                   | 285     |
| <i>Dissection of the Extensor Assembly and of the Skin Anchoring Ligaments (Digital Bands)</i> | 286     |
| 5. Interossei                                                                                  | 290     |
| <i>Dorsal Interosseus I</i>                                                                    | 290     |
| <i>Palmar Interosseus II</i>                                                                   | 290     |
| <i>Dorsal Interosseus II</i>                                                                   | 292     |
| <i>Dorsal Interosseus III</i>                                                                  | 293     |
| <i>Palmar Interosseus III</i>                                                                  | 294     |
| <i>Dorsal Interosseus IV</i>                                                                   | 294     |

|                                                             |     |
|-------------------------------------------------------------|-----|
| <i>Palmar Interosseus IV</i>                                | 295 |
| 6. General View of the Hand                                 | 295 |
| <b>8. General Discussion and Summary</b>                    | 296 |
| 1. The Ray-Like Arrangement of the Human Hand               | 296 |
| <i>Metacarpophalangeal Joints</i>                           | 296 |
| <i>Interphalangeal Joints</i>                               | 298 |
| <i>Interossei, Thenar and Hypothenar</i>                    | 299 |
| <i>Interossei</i>                                           | 299 |
| <i>Thenar and Hypothenar (general remarks)</i>              | 300 |
| <i>Thenar</i>                                               | 300 |
| <i>Hypothenar</i>                                           | 301 |
| 2. The Palmar Anchoring System                              | 301 |
| 3. The Free Finger                                          | 303 |
| 4. Spaces in the Hand                                       | 305 |
| <i>The Subcutaneous Hypothenar Space</i>                    | 305 |
| <i>Spaces in the Palm of the Hand</i>                       | 305 |
| <i>Spaces at the Dorsal Side of the Hand</i>                | 306 |
| 5. Nerves and Vessels                                       | 306 |
| <i>Nerves of the Hand</i>                                   | 306 |
| <i>Vessels of the Hand</i>                                  | 308 |
| 6. Carpometacarpal Transition Zone                          | 311 |
| 7. The Carpal Area                                          | 311 |
| 8. Concluding Remarks                                       | 313 |
| <b>9. Functional Considerations</b>                         | 315 |
| 1. Introduction                                             | 315 |
| 2. The Articulation of the Finger                           | 315 |
| <i>Interphalangeal Articulation</i>                         | 318 |
| <i>The Metacarpophalangeal-Interphalangeal Joint System</i> | 326 |
| 3. Electromyography of Free, Unconstrained Motions          | 330 |
| 4. Clawing Movement and Clawing Position                    | 333 |
| 5. Electromyography of Resisted Movements                   | 333 |
| 6. Thumb Articulation                                       | 337 |
| 7. Carpal Function                                          | 342 |
| Bibliography                                                | 345 |
