

Atlas of Thumb and Finger Reconstruction

Guillermo Loda

1 **Anatomy and Biomechanics**

1.1	Neurovascular Anatomy of the Fingers, Thumb, and Hand	1	Methods and Materials	13
	Vascular Anatomy of the Fingers	1	Results	14
	Vascular Anatomy of the Thumb	4	Discussion	15
	Vascular Anatomy of the Hand	6	Conclusions	17
	Practical Conclusions in Reconstructive Strategy	10	1.3 Biomechanics of the Thumb and Fingers	18
1.2	Embryological Study of the Fingertip	13	Biomechanics of the Thumb	18
	Introduction	13	Biomechanics of the Fingers	19

2 **Vascular Rein Technique**

2.1	Vascular Rein Technique: a New Method for Thumb Reconstruction	21	Sensitivity of the Neothumb	26
2.2	Anatomical Basis	22	Bone Graft Interposition	26
2.3	Surgical Procedure	23	Resurfacing the Radial Side of the Reconstructive Thumb	27
	Volar Approach	23	Proximal Thumb Amputation	28
	Dorsal Approach	24	2.4 Classification of the Vascular Rein Technique ...	30
	Dorsal Region	24	2.5 Clinical Cases	35
	Distal Phalanx	26	Vascular Rein Technique Types I und II	35
	Donar Pulp of the Middle Finger	26	Variations of the Technique and Options for its Application	45
	Nail Osteofasciocutaneous Transposition	26		

3 **Replantation and Revascularization**

3.1	Replantation	47	Replantation Syndromes	60
	Introduction	47	3.2 Revascularization	62
	Historical Review	47	Revascularization of the Hand—Strategy	62
	Definitions	47	Revascularization of the Thumb and Fingers ...	69
	Indications	48	3.3 Clinical Cases	76
	Macroreplantations	48	Macroreplantation	76
	Microreplantations	52		

4 **Thumb Reconstruction**

4.1	Classification of Thumb Amputations	79			
	Reconstructive Strategy after Thumb Amputations	80			
4.2	Emergency Thumb Reconstruction Using Microsurgical Procedures	83			
	Heterotopic Replantation	83			
4.3	Elective Thumb Reconstruction Using Microsurgical Procedures	94			
	Anatomical Basis	94			
	The Gilbert Classification	94			
	Toe Transfer	96			
	The Toe Bank	103			
	Considerations	104			
4.4	Classic Macrosurgical Procedures for Thumb Reconstruction	105			
	Adjacent Flap	105			
	Distant Flap	106			
	Classic Methods	108			
	Chinese Flap or Radial Artery Flap	108			
	Classic Methods of Pollicization	109			
4.5	Custom-Made Thumbs and Reconstruction without Donor-Site Mutilation: a Comparative Analysis	111			
	Vascular Rein Technique	112			

5 **Finger and Thumb Reconstruction**

5.1	Reconstruction of the Fingertip	115			
	Skin Quality	115			
	Reconstructive Options for Fingertip and Nail-Bed Injuries	120			
	Classification and Strategy—Reconstruction of Fingertip Amputations	120			
	Reconstruction of Thumbtip Amputations	127			
5.2	Clinical Cases	129			
5.3	Digital Lengthening	140			
	Phalangization	140			
	Digital Lengthening by Tissue Apposition	140			
	Digital Lengthening with Bone Lengthening	141			
	Lengthening of Digital Stump (Author's Technique)	142			
	Thumb Lengthening	145			
5.4	Digital Pollicization	148			
	Digital Pollicization—Type I	152			
	Capsular Arthroplasty (Author's Technique)—Metacarpal Trapezium	152			
5.5	Stump Transposition	154			
	Hilgenfeldt Operation	154			
	Marginal Amputations	154			

6 **The Reconstruction of Digital Pinch**

6.1	The Reconstruction of Digital Pinch in Bilateral Amputees	156			
	Classification of Mutilated Hands	156			
	Mutilated Hands: the Most Common Types	159			
	Reconstruction of Digital Pinch (Fingers)	161			
	Complex Reconstructions of Digital Pinch	162			
	Complex Reconstructions after Serious Mutilations: Principal Strategies	162			
	Priorities for the Reconstruction of Digital Pinch	162			
	Surgical Strategy	163			
	Examples of Reconstructive Strategies	164			
	Philosophies of Digital-Pinch Reconstruction for Bilateral Amputees	172			
6.2	Reconstruction of Digital Pinch with Prosthesis or Orthosis	179			
	History	179			
	Initial Rehabilitation of the Amputee	179			
	Treatment of the Stump	179			
	Considerations Regarding Prostheses	179			
	Amputations at Different Levels	182			
	Controversy Regarding Different Types of Terminals	183
