

Joseph H. Boyes, M.D.

Bunnell's Surgery of
THE HAND

Fifth Edition

J. B. Lippincott Company

Contents

I. THE NORMAL HAND	1
Skin and Creases	1
Movements of the Arm and Forearm	2
Movements of the Wrist	3
Movements of the Hand	5
Mechanics of Muscle and Tendon Action	9
Sensibility and Sensation	20
Surgical Anatomy	23
2. PHYLOGENY AND COMPARATIVE ANATOMY	28
Phylogenetics of Intrinsic Muscles of Hand	28
Pectoral Girdle	34
Arm	39
Forearm	40
Hand	41
Phylogeny and Differentiation of Muscles from Amphibia to Mammals	45
Strange Specialization for Adaptation of Manus	47
Primate Hand	50
Embryology and Development	54
3. CONGENITAL DEFORMITIES	59
Incidence	59
Classification	59
Etiology	61
Absence of All or Parts of Limbs	70
Shoulder, Arm and Forearm Deformities	72
Clinarthrosis or Deviation in Alignment of Joints	80
Congenital Dislocations	82
Synostoses	82
Deformities of the Hands	83
Deformities of Fingers	85
Arteriovenous Abnormalities	97
Knuckle Pads	97
Principles of Treatment of Congenital Deformities	99
4. EXAMINATION OF THE HAND	108
History	108
Examination	109

4. EXAMINATION OF THE HAND—Continued	
Diagnosis	119
Malingering	125
Records and Reports	125
Impairment of Function and Rating of Disability	126
5. PRINCIPLES OF RECONSTRUCTION	130
Position	131
Cover	132
Prehension	134
Sensibility	136
Placement	139
Order of Procedures	139
Operative Technic	139
Prognosis	160
6. SPLINTS AND FUNCTIONAL BRACING	163
Splinting to Prevent Deformity	163
Classification of Splints	163
Active Splinting by Spring or Elastic	167
Types of Splints	170
Splinting for Paralysis	181
Internal Splinting	183
Functional Bracing	184
Bioelectrically Controlled Prostheses	185
7. SKIN AND CONTRACTURES	187
Effect of Cicatrix	187
Flexion Contractures	187
Dupuytren's Contracture	225
Volkman's Ischemic Contracture	239
Local Intrinsic Contracture in the Hand	251
8. BONES	261
Correction of Deformities	261
Bones of the Forearm	268
Madelung's Deformity	278
Reconstruction After Metacarpal Losses	278
Carpal or Metacarpal Boss	281
Traumatic Degeneration of Carpal Bones	282
9. JOINTS	287
Prevention of Joint Stiffness	288
Mobilizing Stiffened Joints	290
Surgical Repair of Joints	294
Rheumatoid Arthritis	313

9. JOINTS—<i>Continued</i>	
Treatment of the Rheumatoid Hand	324
Gout	334
10. NERVES	338
Importance of Nerve Function in the Upper Extremity	338
Individual Nerves	346
Treatment of Injured Nerves	373
Cerebral Palsy	383
11. TENDONS	393
Technic of Tendon Repair	393
Problem of Gliding	400
Free Tendon Grafts	404
Tendon Transfer	409
Postoperative Treatment	429
Evaluation of Results After Tendon Reconstruction	434
Special Situations Affecting Tendons	436
12. INTRINSIC MUSCLES OF THE HAND	457
Intrinsic Muscles of the Fingers	457
Intrinsic Muscles of the Thumb	481
13. RECONSTRUCTION OF THE THUMB	502
Loss of the Thumb	502
Tubed Pedicles to Lengthen the Thumb	504
Pollicization Operation	506
Digital Transfer	516
Résumé of Principles in Thumb Reconstruction	518
14. SHOULDER AND ELBOW	521
Shoulder	521
Elbow Region	536
15. WOUNDS, BURNS AND AMPUTATIONS	545
Wounds	545
Burns	561
Amputations	566
16. FRACTURES AND DISLOCATIONS	580
Special Factors in the Hand	580
Injuries of the Wrist	581
Fractures of the Metacarpals and Phalanges	597
Dislocations	605
Injuries of the Thumb	606

17. INFECTIONS	613
Pyogenic Infections	613
Special Infections	631
18. TROPHIC AND VASCULAR CONDITIONS	643
Trophic Conditions	643
Vascular Lesions	659
19. TUMORS	666
The Common Tumors of the Hand	666
Bone Tumors	691
Muscle Tumors	699
Subungual Melanoma	700
Carcinoma of the Nail	702
Tendon Sheath Tumors—Synovium	703
Peripheral Nerve Tumors	704
INDEX	711
