|                                                                 |               |
|-----------------------------------------------------------------|---------------|
| <b>1 Introduction</b>                                           | <b>1</b>      |
| 1.1 General Directives                                          | 1             |
| 1.2 General Surgical Suggestions                                | 3             |
| 1.2.1 Skin Preparation                                          | 3             |
| 1.2.2 Positioning                                               | 4             |
| 1.2.3 Anesthesia                                                | 4             |
| 1.2.4 Exsanguination                                            | 4             |
| 1.2.5 Instrumentarium                                           | 4             |
| 1.2.6 Operative Technique                                       | 5             |
| 1.2.7 Postoperative (Wound) Care                                | 6             |
| 1.2.8 Postoperative Exercises                                   | 6             |
| 1.3 Review of Frequent Errors of Therapy and Their Consequences | 6             |
| <br><b>2 Syndactylies</b>                                       | <br><b>10</b> |
| 2.1 Cutaneous Syndactylies                                      | 10            |
| 2.1.1 Introduction                                              | 10            |
| 2.1.1.1 General Remarks                                         | 10            |
| 2.1.1.2 Timing of Surgery                                       | 11            |
| 2.1.1.3 General Surgical Directives                             | 11            |
| 2.1.1.4 Postoperative Care                                      | 12            |
| 2.1.2 Total Syndactyly of Fingers of Equal Length (III/IV)      | 14            |
| 2.1.3 Subtotal Syndactyly of Fingers of Unequal Length (IV/V)   | 20            |
| 2.1.4 Total Syndactyly of Several Long Fingers                  | 22            |
| 2.1.5 Partial Syndactyly ("Short Type")                         | 26            |
| 2.1.6 Partial Syndactyly ("Long Type")                          | 28            |
| 2.2 Osseous Syndactylies                                        | 30            |
| 2.2.1 Introduction: "Apert Hand"                                | 30            |
| 2.2.1.1 General Remarks                                         | 30            |
| 2.2.1.2 Timing of Surgery                                       | 32            |
| 2.2.1.3 General Surgical Directives                             | 32            |
| 2.2.1.4 Postoperative Care                                      | 33            |
| 2.2.2 Total Syndactyly Between Thumb and Long Fingers           | 34            |
| 2.2.3 Partial Syndactyly Between Thumb and Index Finger         | 40            |
| 2.2.4 Total Syndactyly of the Long Fingers with Acrosynostosis  | 42            |
| 2.2.5 Radial Clinodactyly of the Thumb                          | 46            |

|                                                                                                                         |            |
|-------------------------------------------------------------------------------------------------------------------------|------------|
| 2.3 Recurrent Syndactylies . . . . .                                                                                    | 50         |
| 2.3.1 Introduction . . . . .                                                                                            | 50         |
| 2.3.1.1 General Remarks . . . . .                                                                                       | 50         |
| 2.3.1.2 Timing of Surgery . . . . .                                                                                     | 50         |
| 2.3.1.3 General Surgical Directives . . . . .                                                                           | 51         |
| 2.3.1.4 Postoperative Care . . . . .                                                                                    | 51         |
| 2.3.2 Recurrent Syndactyly of the Long Fingers (Narrow "Short" Type) . . . . .                                          | 52         |
| 2.3.3 Recurrent Syndactyly of the Long Fingers (Wide "Short" Type) . . . . .                                            | 56         |
| 2.3.4 Recurrent Syndactyly of the Long Fingers ("Short" Type) with Scars<br>Extending to the Distal Phalanges . . . . . | 58         |
| 2.3.5 Recurrent Syndactyly of the Long Fingers ("Long" Type) . . . . .                                                  | 60         |
| 2.3.6 Recurrent Syndactyly of the Long Fingers ("Long" Type) with Scars<br>Extending to the Distal Phalanges . . . . .  | 64         |
| 2.3.7 Recurrent Syndactyly Between Thumb and Index Finger . . . . .                                                     | 68         |
| <b>3 Peripheral Hypoplasias . . . . .</b>                                                                               | <b>73</b>  |
| 3.1 Introduction . . . . .                                                                                              | 73         |
| 3.1.1 General Remarks . . . . .                                                                                         | 73         |
| 3.1.2 Indications for Surgery . . . . .                                                                                 | 75         |
| 3.1.3 Timing of Surgery . . . . .                                                                                       | 75         |
| 3.1.4 General Surgical Directives . . . . .                                                                             | 76         |
| 3.1.5 Postoperative Care . . . . .                                                                                      | 77         |
| 3.2 Syndactyly with Digiti Superducti . . . . .                                                                         | 78         |
| 3.3 Interdigital Cutaneous Bridge ("Bridge Syndactyly") . . . . .                                                       | 84         |
| 3.4 Partial Syndactyly Between Thumb and Index Finger . . . . .                                                         | 86         |
| 3.5 Total Syndactyly of Rudimentary Fingers of Unequal Length . . . . .                                                 | 88         |
| 3.6 Total Syndactyly of Rudimentary Fingers of Equal Length . . . . .                                                   | 92         |
| 3.7 Anular Grooves with Excessive Dorsal Soft Tissue Finger Pads . . . . .                                              | 96         |
| 3.8 Conical Rudimentary Finger; Excessive Dorsal Soft Tissue Finger Pad . . . . .                                       | 100        |
| 3.9 Rudimentary Thumb with Excessive Soft Tissue . . . . .                                                              | 102        |
| 3.10 Anular Groove and Defect Pseudarthrosis of the Thumb . . . . .                                                     | 106        |
| 3.11 Rudimentary Index Finger with Excessive Soft Tissue and Anular<br>Groove . . . . .                                 | 112        |
| 3.12 Anular Groove of the Forearm . . . . .                                                                             | 116        |

| 4.1 Introduction . . . . .                                                                                              | 119        |
| 4.1.1 General Remarks . . . . .                                                                                         | 119        |
| 4.1.1.1 Polydactylies . . . . .                                                                                         | 119        |
| 4.1.1.2 Oligodactylies . . . . .                                                                                        | 120        |
| 4.1.2 Timing of Surgery . . . . .                                                                                       | 121        |
| 4.1.3 General Surgical Directives . . . . .                                                                             | 122        |

|                                                                                                                                          |     |
|------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 4.1.4 Postoperative Care . . . . .                                                                                                       | 123 |
| 4.2 Thumb Hypo- and Aplasias . . . . .                                                                                                   | 124 |
| 4.2.1 Partial Syndactyly Combined with Second-Degree Thumb Hypoplasia . . . . .                                                          | 124 |
| 4.2.2 Partial Syndactyly Combined with Second-Degree Thumb Hypoplasia and a Tight Web Space . . . . .                                    | 126 |
| 4.2.3 Second-Degree Thumb Hypoplasia with Dysplasia of the First Metacarpophalangeal Joint and Hypo- or Aplasia of M. Opponens . . . . . | 136 |
| 4.2.4 Second/Third-Degree Thumb Hypoplasia (Index Finger Pollicization; Incision According to Blauth) . . . . .                          | 140 |
| 4.2.5 Thumb Aplasia (and Fourth-Degree Thumb Hypoplasia) (Index Finger Pollicization; Incision According to Blauth) . . . . .            | 150 |
| 4.2.6 Thumb Aplasia (Index Finger Pollicization; Incision According to Buck-Gramcko) . . . . .                                           | 152 |
| 4.3 Long Finger Oligodactylies . . . . .                                                                                                 | 154 |
| 4.3.1 Oligosyndactyly with Acrosynostosis . . . . .                                                                                      | 154 |
| 4.3.2 Oligodactyly with Total Syndactyly ("Spoon Hand") . . . . .                                                                        | 156 |
| 4.3.3 Oligodactyly with Total Syndactyly of the Long Fingers and Acrosynostosis . . . . .                                                | 158 |
| 4.3.4 Oligodactyly with "Duplication" of a Middle and Distal Phalanx (and Acrosynostosis) . . . . .                                      | 162 |
| 4.3.5 Oligodactyly with Synostosis of the Proximal Phalanges . . . . .                                                                   | 166 |
| 4.4 Thumb Duplication . . . . .                                                                                                          | 170 |
| 4.4.1 Incomplete Duplication of the Distal Phalanx of the Thumb . . . . .                                                                | 170 |
| 4.4.2 Mirrorlike Duplication of the Distal Phalanx of the Thumb (with Widening of Its Proximal Phalanx) . . . . .                        | 172 |
| 4.4.3 Duplication of the Distal Phalanx of the Thumb with a Smaller Radial Element . . . . .                                             | 176 |
| 4.4.4 Thumb Duplication with Triphalangeal Radial Element . . . . .                                                                      | 178 |
| 4.4.5 Thumb Duplication with an Ulnar Rudimentary Metacarpal . . . . .                                                                   | 182 |
| 4.4.6 Thumb Duplication with Smaller Radial Element and Deformed Metacarpal . . . . .                                                    | 184 |
