Dupuytren's Disease

Pathobiochemistry
and Clinical
Management

Springer-Verlag

Morphology	1
W. Mohr and D. Wessinghage Morphology of Dupuytren's Disease	3
G. Brandes, E. Reale, P. Brenner, and T. Körner Interactions Between Proteoglycans and Collagen Fibrils in the Palmar Fascia in Dupuytren's Disease	16
G.A.C. Murrell, M.J.O. Francis, and C.R. Howlett Myofibroblasts Are Not Specific to Dupuytren's Disease	24
A. Meinel The Significance of Skin Anchoring Fibres in Palmar Fibrosis: Brief Comment	34
Pathobiochemistry of Fibrillar Component	35
A.J. Bailey Collagen Changes in Dupuytren's Disease	37
E.J. Menzel, J. Neumüller, A. Rietsch, and H. Millesi Connective Tissue Autoantibodies in Dupuytren's Disease: Associations with HLA DR3	49
G.A.C. Murrell and M.J.O. Francis Collagen Production by Cultured Dupuytren's Fibroblasts	62

Proteoglycans and Glycosaminoglycans	71
E. Gurr, M. Borchert, W. Borchert, and A. Delbrück Proteoglycans in Biopsies of Dupuytren's Contracture	73
N. Gässler Glycosaminoglycan Distribution Pattern in Dupuytren's Contracture Biopsies	85
N. Gässler, P. Brenner, A. Berger, and A. Delbrück Biochemical Parameters for the Diagnosis of Dupuytren's Disease	94
Pathobiochemistry of Cells in Dupuytren's Contracture	99
J. Neumüller Investigations of Cell Cultures Derived from Patients Suffering from Dupuytren's Contracture	101
A. Delbrück and H. Schröder Fibroblast Gel Culture: A Model for Biochemical Investigations of Dupuytren's Contracture	111
C. Sachse and P. Brenner Reactivity of Cells in Nodules of Dupuytren's Contracture with Monoclonal Antibodies Recognizing Leukocyte Antigens and von Willebrand's Factor	117
D.T. Shum, G. Pringle, B. Hasegawa, J.S. Botz, and R.M. McFarlane Demonstration of Myofibroblasts Using a Novel Murine Monoclonal Antibody, 3C2G10.7 Raised from Proliferating Cells in Dupuytren's Disease	127
I.L. Naylor, D.J. Coleman, R.A. Coleman, S.E. Cross, and I.T.H. Foo Reactivity of Nodular Cells in Vitro: A Guide to the Pharmacological Treatment of Dupuytren's Contracture	139

Extracellular Matrix Components and Macromolecular Interactions	151
A.M. Gressner	
Stromal-Epithelial Cell Interactions in the Mechanisms of Hepatocyte Injury, Liver Cell Regeneration and Fibrogenesis	153
J.E. Scott	
Proteoglycan – Collagen Fibril Interactions in Tissues	171
H. Millesi, R. Reihnsner, J. Menzel, G. Hamilton, and R. Mallinger	
Changes in the Biomechanical Properties of Diseased Tissue as Pathogenetic Factors in Dupuytren's Contracture	178
Fibromatoses	191
W. Mohr and D. Wessinghage	
Localization and Morphology of Different Fibromatoses	193
H. Notbohm, S. Mosler, and J. Hoch	
Thermal Stability and Fibrillogenesis of Collagen from Tissue of Patients with Dupuytren's Disease ...	202
S. Shoshan, I. Babayof, I. Peleg, F. Grinnell, N. Ron, S. Funk, and E.H. Sage	
Macrophage Activity, Fibronectin, and SPARC Protein in Experimentally Induced Granuloma	213
G. Gabbiani	
Modulation of Fibroblastic Cytoskeletal Features During Dupuytren's Disease	222
G.A.C. Murrell and M.J.O. Francis	
Oxygen Free Radicals and Dupuytren's Disease	227
Clinical Findings and Epidemiology of Dupuytren's Disease	235
P. Mailänder, P. Brenner, and A. Berger	
Clinical Findings in Dupuytren's Disease	237

P. Brenner, P. Mailänder, and A. Berger Epidemiology of Dupuytren's Disease	244
Clinical Management of Dupuytren's Disease	255
J. Geldmacher Limited Fasciectomy	257
P. Burge Fasciotomy and the Open Palm Technique	264
J. Varian Skin Grafting in the Management of Dupuytren's Disease	268
C. Leclercq and R. Tubiana Recurrence in Dupuytren's Disease	272
E. Euler, K. Wilhelm, and T. Kreusser Refinements of Plastic Surgery in Relapsing Dupuytren's Disease: Incisions, Flaps, Treatment of Perfusion Disorders, Physiotherapy, and Splinting ..	275
J.T. Hueston The Complications and Unsatisfactory Results of Treatment for Dupuytren's Disease	285
A. Messina The Continuous Elongation Technique in Dupuytren's Disease	291
Subject Index	297
