FINGERTIP AND NAILBED INJURIES

Edited by
Guy Foucher

Foreword by J. William Littler

CHURCHILL LIVINGSTONE

Contents

1. Vascular anatomy of the distal phalanx 1
Francisco Brunelli and Giorgio Brunelli
 2. Fingertip function and evaluation of its sensibility 10
Erik Moberg
 3. The histology of sensibility: relationship to clinical care 17
Michael E. Jabaley
 4. Sensory re-education after fingertip injury and reconstruction 27
A. Lee Dellon
 5. Distal digit replantation 40
James R. Urbaniak and Richard D. Goldner
 6. Delayed 'directed' wound healing 45
Raymond Vilain and Michel Ebelin
 7. The advancement rotation flap 48
John Turner Hueston
 8. V-Y advancement flaps 52
Graham Lister
 9. Bipedicled homodigital island flap 62
Bernard McCarthy O'Brien and P. A. Vinod Kumar
 10. Homodigital island advancement flap 65
Alain Gilbert and Francisco Brunelli
 11. The cross-finger flap 74
David M. Evans
 12. Kite flap in reconstruction of distal thumb 79
Jacques Michon
 13. Heterodigital island flap 83
John M. Markley Jr. and J. William Littler
 14. Thenar flap 87
Awf Quaba
 15. Free pulp transfer 92
Harry J. Buncke and Gregory M. Buncke
 16. The use of skin grafts in fingertip injuries 98
D. A. McGrouther and Stuart Martin
 17. Primary and secondary care of nail injuries 103
Guy Magalon and Remy Zalta
 18. Prosthetic contribution in distal amputations 114
Jean M. Pillet and Evelyn J. Mackin
 19. Management of fingertip injury in the child 120
Julien Glicenstein and Robert Haddad
 20. Indications in the management of fingertip injuries 129
Guy Foucher and Donald Sammut
