CONTENTS

Chapter I HISTORY	1
Chapter II HISTOPHYSIOLOGIC STRUCTURE OF THE PERIPHERAL NERVES	4
I. EMBRYOLOGIC SUMMARY	4
II. HISTOLOGIC STRUCTURE OF THE PERIPHERAL NERVE	6
A. NERVE FIBERS	6
Axonal transport	9
Classification of the nerve fibers	16
B. CONNECTIVE TISSUE OF THE PERIPHERAL NERVES	18
Endonerve	18
Perinerve	20
Epinerve	23
C. VASCULAR SUPPLY OF THE PERIPHERAL NERVES	29
1. Extrinsic vascular system	29
Arteries of the peripheral nerves	30
Veins of the nerves	33
2. Intrinsic system	37
3. Lymph vessels	39
D. MOTOR AND SENSORY TERMINATIONS	40
1. Motor terminations	40
Neromuscular junction	41
2. Sensory terminations	43
3. Cutaneous receptors	44
Mechanoreceptors	45
Thermoreceptors	49
Nociceptors	49
Receptors of the cutaneo-mucous zones	50
Receptors of the muscles, tendons and joints	50
Functional characteristics of the receptors	53
Summary	58
Chapter III HISTOPATHOLOGY OF THE PERIPHERAL NERVES LESIONS	59
A. WALLERIAN DEGENERATION OF THE DISTAL PORTION	60
Connective sheath reaction	64
Changes of the target organs	64
B. CHANGES OF THE PROXIMAL PORTION	66
C. REGENERATION	67

Regeneration of the nerves' terminations	
and of the motor receptors	73
Regeneration of the sensory fibers	76
Regeneration of the autonomic fibers	77
Maturing of the regenerated fibers	
and functional restoration	78
FACTORS THAT INFLUENCE REGENERATION	79
Summary	83

Chapter IV CLASSIFICATION OF THE TRAUMATIC LESIONS

OF THE PERIPHERAL NERVES	84
ETIOLOGIC CLASSIFICATION	84
A. Mechanical lesions	84
1. Section	84
2. Elongation	85
3. Compressions	91
Compression syndromes	93
Compression syndromes of the thoracic limb	95
Cervical rib syndrome	96
Anterior scalenic syndrome	96
Knapsack syndrome	99
Suprascapular nerve	99
Circumflex nerve (axillary)	100
Compressions on the arm	101
Compressions on the elbow and forearm	103
Carpal tunnel syndrome	109
Guyon tunnel syndrome	114
Compression syndromes of the pelvic limb	118
Compression of the lumbo-sacral plexus	118
Compression of the ilio-inguinal nerve	118
Meralgia paresthetica	118
Compression of the femoral nerve	119
Compression of the obturator nerve	119
Compression of the great sciatic nerve	120
Compression of the posterior tibial nerve	121
Compression of the lateral popliteal nerve	121
Tarsal tunnel syndrome	122
Morton disease	123
Compression lesion	124
B. OTHER TRAUMATIC LESIONS OF	
THE PERIPHERAL NERVES	125
Radiation lesions of the nerves	125
Thermic burning lesions	127

Combined troncular palsies	235
Lumbar plexus palsies	238
Great sciatic nerve palsy	242
Lateral popliteal nerve palsy	243
Medial popliteal nerve palsy	244
Summary	252

Chapter VI ANESTHESIA IN PERIPHERAL NERVES

MICROSURGERY	253
BRACHIAL PLEXUS BLOCKING	261
Axillary blocking	262
Supraclavicular blocking	265
Subclavicular blocking	268
Interscalenic blocking	269
LOCO-REGIONAL INTRAVENOUS ANESTHESIA	271
LOCO-REGIONAL ANESTHESIA IN THE INFERIOR LIMB	276
Great sciatic nerve blocking	277
Crural nerve blocking	277
Summary	279

Chapter VII MICROSURGICAL TECHNIQUES

OF PERIPHERAL NERVES RECONSTRUCTION	280
I. BASIC PRINCIPLES	280
A. Material base	282
1. Operating microscope	282
2. Microsurgery case	286
3. Auxiliary materials	289
4. Suturing material	292
B. Microsurgery team	294
II. MICROSURGICAL TECHNIQUES OF REPAIRING	
PERIPHERAL NERVES LESIONS	298
Operating moment	300
Surgical approach	303
Microsurgical stage	305
Preparation of the nerve's trunk	306
Direct coaptation	322
A. Epineural suture	326
B. Fascicular suture	332
Circumferential fascicular suture	344
Suture on fascicular groups	345
C. Interfascicular suture	347
D. Epiperineural suture	348
E. Suture on FG with	

epineural splint- Jabaley technique	357
NERVE GRAFT	366
Nerve defect	366
History of the nerve autografts	371
Ideal qualities of the graft	377
Choosing the donor nerve	383
Autografts' classification	
depending on vascularisation	386
Nonvascularised nerve grafts (NVNG)	386
Vascularised nerve grafts (VNG)	389
Classification of the nerve grafts	396
Microsurgical technique in	
nonvascularised nerve grafts	405
Exploring the nerve to be grafted	405
Prelevation of the graft	408
Restoration of the nerve's continuity	415
Preparation of the graft	415
Fascicular identification	418
Orientation and placing of the graft's segments	420
Suture of the graft's segments	
at the end of the nerve	421
Technique in vascularised nerve grafts	427
1. Pediculated VNG	428
2. "In situ" VNG	431
3. "In island" VNG	432
4. Free vascularised nerve graft	437
SPECIAL COAPTATION TECHNIQUES	466
Biological adhesive	466
Using of biologic or nonbiologic tubes	469
Criomicrosurgery	471
Laser using	474
Nerve repair with denaturated muscular graft	475
Neurotisation	476
1. Neuro-cutaneous neurotisation	476
2. Neuro-muscular neurotisation	477
3. Neuro-neuronal neurotisation	480
4. Nerve translocation	489
Facial nerve palsy	490
Summary	494
Chapter VIII POSTOPERATIVE CARE	495
Early postoperative stage	495
Confirmation of the regeneration process	497

Making the optimal conditions for regeneration	498
Prevention of distal trophic disorders	498
Mobility assurance	499
Functional reeducation stage	500
Sensory recovery	501
Motor recovery	505
Summary	508

Chapter IX FACTORS THAT INFLUENCE

THE RESULTS OF NERVE REPAIR	509
A. FACTORS OUT OF CONTROL	510
1. Biochemical factors	510
Nerve growth factor	512
2. Gravity of the nerve lesion	517
3. Level of the lesion	518
4. Age	520
5. Type of damaged nerve	522
6. Associated lesions	524
7. Central readapting capacity	526
8. Associated pathological states	527
B. FACTORS UNDER CONTROL	527
1. Primary therapy of the lesion	527
2. Moment of repairing the damaged nerve	530
3. Quality of microsurgical reconstruction	531
4. Postoperative care	535
C. MIXED FACTORS	535
1. Period between accident and recovery	535
2. Psycho-social factors compared with the evaluation of the results	536
FACTORS THAT INFLUENCE	
THE RESULTS IN NERVE GRAFTS	538
1. Factors depending on the nerve graft	538
2. Factors depending on the receptor nerve	540
3. Restoration of the peripheral innervation	540
4. Graft's bed	540
5. Graft's technique	541
Summary	543

Chapter X CONCLUSIONS

BIBLIOGRAPHY
