# Contents

Chapter 1 A General Review of Microsurgery . . . . .	1
I. A Brief History of Microsurgery . . . . .	1
II. Clinical Application of Microsurgery . . . . .	3
A. Muscular Transplantation with Vascular and Nerve Anastomosis . . . . .	3
B. Segmental Transplantation of the Intestine with Vascular Anastomosis . . . . .	3
C. Transplantation of Bone with Vascular Anastomosis . . . . .	4
D. Transplantation of Joints with Vascular Anastomosis . . . . .	4
E. Free Omentum Transplantation . . . . .	4
F. Free Skin Flap and Subcutaneous Tissue Transplantation . . . . .	5
G. Brain Surgery . . . . .	5
H. Urological Surgery . . . . .	5
I. Obstetrics and Gynecology . . . . .	5
J. Surgery of the Lymphatic System . . . . .	6
III. The Importance of Microsurgical Technique in the Development of Surgical Science . . . . .	6
Chapter 2 The Operating Microscope and Magnifying Loupes . . . . .	8
I. Structure, Principles, Types, and Features . . . . .	9
A. Structure and Principle of the Operating Microscope . . . . .	9
B. The Types and Features of Operating Microscopes . . . . .	17
C. Magnifying Glasses and Loupes . . . . .	26
II. Methods of Application . . . . .	29
A. Application of the Operating Microscope . . . . .	29
B. The Application of the Magnifying Loupe . . . . .	33
III. Fields of Application . . . . .	33
IV. Maintenance of the Operating Microscope and Magnifying Loupes . . . . .	35
Chapter 3 The Instruments and Sutures of Microsurgery . . . . .	37
I. General Requirements of Microinstruments . . . . .	37
II. Features and Requirements of the More Commonly Used Microsurgical Instruments . . . . .	39
A. Tissue Forceps . . . . .	39
B. Scissors . . . . .	40

C. Needle Holders . . . . .	41
D. Microvascular Clamps . . . . .	43
E. Needles and Sutures . . . . .	46
F. Counter Pressor . . . . .	48
G. Microdissecting Forceps . . . . .	48
H. Instruments for Fixing Irrigated Vessels . . . . .	48
I. Irrigating Needles . . . . .	48
J. Microcoagulation and Low-Pressure Suction Apparatus . . . . .	49
III. Maintenance of the Microsurgical Instruments . . . . .	50
IV. The Refinement of Microsurgical Instruments . . . . .	50
<b>Chapter 4 Basic Microsurgical Technique . . . . .</b>	<b>52</b>
I. Basic Technical Training in Microsurgery . . . . .	52
A. The Surgical Microscope . . . . .	53
B. Microsurgical Instruments . . . . .	54
C. Experimental Training in Microsurgery . . . . .	58
II. Preoperative Preparation for and Requirements of Microsurgery . . . . .	63
III. Cooperation Between the Surgeon and the Assistant . . . . .	66
<b>Chapter 5 Microsurgical Suturing Technique . . . . .</b>	<b>68</b>
I. Microvascular Anastomosis . . . . .	68
A. Exposure and Preparation for Anastomosis . . . . .	68
B. Principles of Anastomosis . . . . .	69
C. Suturing Techniques for Small Blood Vessels . . . . .	72
D. Transplantation of Small Blood Vessels . . . . .	84
E. Use of Anticoagulants . . . . .	86
II. Microneural Anastomosis . . . . .	87
A. Exposure . . . . .	88
B. Principles of Neural Anastomosis . . . . .	88
C. Technique of Microneural Anastomosis . . . . .	89
III. Microlymphatic Anastomosis . . . . .	91
A. Lympho-venous Anastomosis . . . . .	91
B. Anastomosis Between Lymph Node and Vein . . . . .	92
<b>Chapter 6 Microsurgery and Pathology . . . . .</b>	<b>93</b>
I. Pathological Changes After Anastomosis of Small Arteries . . . . .	93
A. Pathological Changes in Different Parts of the Artery . . . . .	93
B. Discussion . . . . .	97
C. Conclusion . . . . .	99
II. Pathological Changes After Venous and Lymphatic Anastomosis . . . . .	99
III. Injury and Repair of Peripheral Nerves . . . . .	100
A. Histology of the Peripheral Nerves and Their Degeneration and Regeneration . . . . .	100
B. Types of Nerve Injury . . . . .	102
C. Repair and Transplantation of the Nerve . . . . .	103

<b>Chapter 7 Replantation of Severed Limbs and Digits . . . . .</b>	<b>105</b>
I. Operative Indications . . . . .	107
II. Debridement . . . . .	113
A. General Management . . . . .	113
B. Debridement of Skin, Muscles, Tendons, and Bone . . . . .	114
C. Assessment of the Vascular Bed . . . . .	115
D. Debridement of the Blood Vessels . . . . .	117
III. Replantation Technique . . . . .	118
A. Reconstitution of Skeletal Framework . . . . .	119
B. Reestablishment of Circulation . . . . .	122
C. Muscle and Tendon Repair . . . . .	129
D. Nerve Repair . . . . .	132
E. Skin Covering . . . . .	134
IV. Postreplantation Management . . . . .	134
A. Systemic Reaction . . . . .	134
B. Local Circulatory Impairment . . . . .	136
C. Swelling of the Replanted Limb or Digit . . . . .	139
D. Postreplantation Infection . . . . .	139
E. Anticoagulant Therapy . . . . .	140
F. Application of Hyperbaric Oxygen . . . . .	140
<b>Chapter 8 Free Toe Transfer . . . . .</b>	<b>143</b>
I. Requirements of a Reconstructed Thumb or Finger . . . . .	146
II. Indications . . . . .	147
III. Planning the Operation . . . . .	147
IV. Selection of the Donor Toe . . . . .	148
V. Anesthesia . . . . .	149
VI. Operation Teams . . . . .	149
VII. Preparation of the Recipient Site . . . . .	149
A. Preparation of the Site of the Lost Thumb . . . . .	150
B. Preparation of the Site of the Lost Finger . . . . .	151
VIII. Isolating the Second Toe . . . . .	152
IX. Steps and Methods of Transferring the Second Toe . . . . .	155
A. Isolation of the Second Toe . . . . .	155
B. Perfusion of the Second Toe . . . . .	155
C. Verification of the Planning of the Operative Procedure .	155
D. Insertion of a Kirschner's Wire . . . . .	156
E. Coaptation of the Bone . . . . .	156
F. Suturing the Articular Capsule . . . . .	156
G. Prevention of Kinking . . . . .	157
H. Anastomosis of the Vessels . . . . .	157
I. Rubber Tissue Drainage . . . . .	163
J. Suturing the Tendon . . . . .	164
K. Suturing the Nerve . . . . .	164
L. Suturing the Skin . . . . .	166
M. Ischemic Time of the Free Toe . . . . .	166
X. Thumb Reconstruction . . . . .	166
A. Simple Total Loss of the Thumb . . . . .	166
B. Total Loss of the Thumb with Partial or Total Loss of Its Metacarpal Bone . . . . .	170

C. Total Loss of the Thumb and All Fingers . . . . .	170
D. Loss of the Thumb and Most of the Fingers . . . . .	170
E. Loss of the Thumbs and All Fingers on Both Hands . . . . .	172
XI. Finger Reconstruction . . . . .	172
XII. Intraoperative Prevention and Treatment of Vascular Spasm . . . . .	174
XIII. Intraoperative Thrombosis and Its Management . . . . .	175
XIV. General Postoperative Management . . . . .	176
XV. Postoperative Complications and Their Management . . . . .	178
A. Impediment of the Venous Return . . . . .	178
B. Impediment of the Arterial Blood Supply . . . . .	179
C. Atrophy and Thinning of the Transferred Toe . . . . .	180
D. Infection . . . . .	180
E. Edema of the Foot . . . . .	180
XVI. Exercise . . . . .	181
A. Active Flexion-Extension of the Metacarpophalangeal Joint and Digital Joint . . . . .	182
B. Passive Flexion-Extension of the Joints . . . . .	182
C. Counterresistance Exercise . . . . .	182
D. Spreading of the First Web Space . . . . .	182
E. Technical Exercise . . . . .	183
XVII. Key to Success of the Operation: A Summary . . . . .	184
 Chapter 9 Free Thumb Transfer . . . . .	186
I. Indications for Selection . . . . .	189
II. Planning the Operation . . . . .	190
III. Anesthesia . . . . .	190
IV. Operation Teams . . . . .	190
V. Preparation of the Recipient Finger Site . . . . .	190
VI. Method for Isolating the Thumb . . . . .	191
VII. Method of Transfer . . . . .	194
VIII. Postoperative Management . . . . .	195
IX. Case Presentation . . . . .	195
 Chapter 10 Free Skin Flap Transfer . . . . .	198
I. Surgical Indications . . . . .	200
II. Planning of the Operation . . . . .	200
III. Requirements of the Recipient Area . . . . .	201
IV. Selection of the Donor Site . . . . .	201
V. Free Skin Flaps from the Commonly Used Donor Sites . . . . .	201
A. Lower Abdominal Skin Flap . . . . .	201
B. Groin Skin Flap . . . . .	205
C. Skin Flap from the Dorsum of the Foot . . . . .	206
D. Deltpectoral Flap . . . . .	207
VI. Anesthesia . . . . .	207
VII. Operation Teams . . . . .	207
VIII. Preparation of the Recipient Region . . . . .	208
A. Fresh Wound After Trauma . . . . .	208
B. Chronic Wounds with Exposed Bone . . . . .	208
C. Management of an Aseptic Wound . . . . .	208

IX. Formation of the Lower Abdominal Free Skin Flap . . . . .	218
X. Steps and Methods for Transferring the Free Skin Flap . . . . .	219
A. Severance of the Vessels of the Skin Flap . . . . .	219
B. After Isolation of the Skin Flap . . . . .	221
C. Regrouping and Matching of the Vessels . . . . .	221
D. Vascular Anastomosis . . . . .	222
E. Closure of Wound and Drainage with Rubber Tissue . . . . .	226
XI. Management of Intraoperative Changes in the Free Skin Flap . . . . .	227
XII. Postoperative Management and Complications . . . . .	229
XIII. Conditions for Successful Free Skin Flap Transfer . . . . .	231
 Chapter 11 Free Muscle Transplantation . . . . .	232
I. History . . . . .	232
II. Operative Indications . . . . .	234
III. Selection of Donor Muscles . . . . .	237
A. Selection of Simple Muscle Grafts . . . . .	237
B. Selection of Free Muscle Grafts with Attached Skin . . . . .	254
IV. Operative Procedure . . . . .	255
A. Free Pectoralis Major Grafting in the Treatment of Ischemic Contracture of the Flexors of the Forearm . . . . .	255
B. Treatment of Facial Palsy by Free Gracilis Grafting . . . . .	257
C. Treatment of Brachial Paralysis by Free Gracilis Grafting . . . . .	258
D. Treatment of Facial Palsy by Transplantation of Free Extensor Digitorum Brevis . . . . .	258
E. Treatment of Facial or Leg Defects by Free Gracilis Grafting with Attached Skin . . . . .	259
F. Treatment of Flexor Defects of the Forearm by Grafting of Free Rectus Abdominis with Attached Skin . . . . .	259
V. Postoperative Management . . . . .	260
 Chapter 12 Free Bone Grafting . . . . .	261
I. Operative Indications . . . . .	261
A. Inflammatory Diseases . . . . .	262
B. Bone Tumors . . . . .	263
C. Trauma . . . . .	263
D. Failure of Conventional Large-Sized Bone Grafting . . . . .	264
E. Congenital Pseudarthrosis of the Tibia . . . . .	264
II. Donor Selection and Techniques of Removal . . . . .	266
A. Fibula . . . . .	266
B. Rib . . . . .	269
C. Ilium . . . . .	270
III. Operative Procedure . . . . .	270
A. Preoperative Requisitions and Preparation . . . . .	270
B. Preparation of the Recipient Region . . . . .	270
C. Bone Fixation . . . . .	271
D. Reestablishment of Circulation . . . . .	272
E. External Fixation . . . . .	273

IV. Postoperative Management . . . . .	273
A. Roentgenography . . . . .	273
B. Angiography . . . . .	273
C. Isotopic Examination . . . . .	274
D. Tetracycline Fluorescence . . . . .	276
E. Ultrasonic Doppler Effect . . . . .	276
V. The Evaluation and Future of Free Bone Grafting . . . . .	276
 Chapter 13 Transplantation of Intestinal Segment and Great Omentum . . . . .	280
Application of Microsurgical Techniques in the Transplantation of an Intestinal Segment for Repair of Esophageal Defects	280
I. A Historical Review of Reparative Surgery of the Esophagus .	280
II. Experimental Study of Autogenous Free Transplantation of a Segment of Jejunum . . . . .	283
A. Animals Used . . . . .	283
B. Anesthesia . . . . .	283
C. Experimental Method . . . . .	283
D. Results . . . . .	284
III. Indications and Methods of Clinical Application of Autogenous Graft of Intestinal Segments . . . . .	284
A. Selection of Blood Vessels in the Recipient Region . . . . .	284
B. Orientation of the Intestinal Segment . . . . .	285
C. Complications After Transplantation of an Intestinal Segment . . . . .	286
D. Operative Procedures . . . . .	286
IV. Postoperative Care of Cases of Transplantation of the Intestinal Segment . . . . .	299
V. Evaluation of the Operative Procedure for Reconstructing Transplantation of Great Omentum . . . . .	300
I. Surgical Anatomy of the Great Omentum . . . . .	302
II. Method of Free Graft of the Great Omentum . . . . .	305
 Chapter 14 Application of Microsurgical Technique in Tumor Surgery	308
I. Resection of Benign Tumors of Important Viscera or Nervous Tissue . . . . .	309
II. Resection of Hemangiomas or Aneurysms . . . . .	310
III. Functional Reestablishment After Tumor Resection . . . . .	311
A. Free Skin Flap Grafting After Tumor Resection . . . . .	312
B. Tumor Resection and Segmental Free Grafting of the Intestine . . . . .	312
C. Tumor Resection and Free Bone Grafting . . . . .	312
IV. Replantation of the Distal Portion of the Limb After Resection of a Tumor-Bearing Segment . . . . .	313
A. Indications for Segmental Resection and Replantation	314

B. Principles of the Operation . . . . .	314
C. Types of Segmental Resection and Replantation . . . . .	315
 Chapter 15 Microsurgical Techniques in Neurosurgery . . . . .	322
Application of Microsurgical Techniques in the Central Nervous System . . . . .	322
I. General Review . . . . .	322
A. Cerebrovascular Diseases . . . . .	322
B. Brain Tumors . . . . .	324
C. Cranial Nerve and Peripheral Nerve Surgery . . . . .	326
D. Spinal Cord . . . . .	326
E. Congenital Diseases and Others . . . . .	327
II. Extra - Intracranial Artery Bypass Surgery . . . . .	327
A. Indications . . . . .	327
B. Contraindication of Bypass Operations . . . . .	328
C. Preoperative Examinations . . . . .	329
D. Operative Procedures . . . . .	332
E. Timing of the Operation . . . . .	333
F. Anesthesia . . . . .	333
G. Operative Technique . . . . .	333
H. Postoperative Management . . . . .	336
I. Complications and Mortality . . . . .	337
J. Results . . . . .	337
III. Facial Nerve - Spinal Accessory Nerve Anastomosis . . . . .	339
A. Indications for Surgery . . . . .	339
B. Operative Techniques . . . . .	339
C. Postoperative Management . . . . .	340
Application of Microsurgical Techniques in Peripheral Nerve Injuries . . . . .	340
I. Structure of the Peripheral Nerve . . . . .	341
II. Regeneration of the Nerve Fiber . . . . .	343
III. Types of Nerve Injury . . . . .	344
A. Severance of the Nerve . . . . .	344
B. Swelling of the Nerve . . . . .	344
C. Adhesion and Compression of the Nerve . . . . .	344
D. Transposition and Slipping of the Nerve . . . . .	345
E. Injury Due to Drugs . . . . .	345
IV. Surgical Indications . . . . .	345
A. Emergency Operation . . . . .	345
B. Early Operation . . . . .	345
C. Late Operation . . . . .	346
V. Operative Technique . . . . .	346
A. Suture of Epineurium . . . . .	347
B. Suture of Perineurium . . . . .	349
C. Nerve Graft . . . . .	352
D. Pedicle Nerve Graft . . . . .	354
E. Neurolysis . . . . .	355
F. Decompression of the Nerve . . . . .	355
G. Splitting the Branch from the Nerve Trunk . . . . .	356

VI. Application of Microsurgery in Replantation of Severed Limbs and Digits and Transplantation of Limbs and Other Tissues	356
VII. Postoperative Management . . . . .	357
Chapter 16 Application of Microsurgical Techniques in Otolaryngology . . . . .	359
I. Stapedectomy . . . . .	359
A. A Brief History . . . . .	359
B. Indications and Selection of Patients for Surgery . . . . .	359
C. Types of Operative Technique . . . . .	360
D. Operative Procedure . . . . .	361
E. Preparation and Installation of Stapes Prosthesis . . . . .	366
II. Myringoplasty . . . . .	370
A. Indications . . . . .	370
B. Operative Technique . . . . .	370
C. Postoperative Management . . . . .	375
D. Results of Therapy . . . . .	375
III. Ossicular Chain Reconstruction . . . . .	376
A. Indications . . . . .	376
B. Operative Procedure . . . . .	377
C. Postoperative Management . . . . .	381
D. Causes of Failure . . . . .	382
E. Results . . . . .	382
IV. Facial Nerve Operations . . . . .	382
A. Indications . . . . .	383
B. Operative Procedure . . . . .	384
C. Postoperative Management . . . . .	389
D. Therapeutic Effect . . . . .	391
V. Operations of the Internal Acoustic Meatus . . . . .	392
A. Indications . . . . .	392
B. Preoperative Preparation . . . . .	393
C. Operative Instruments . . . . .	394
D. Operative Procedure . . . . .	394
E. Postoperative Care . . . . .	399
VI. Repair of the Recurrent Laryngeal Nerve . . . . .	400
A. Indications . . . . .	400
B. Operative Procedure . . . . .	401
C. Results . . . . .	404
D. Case Presentation . . . . .	405
Chapter 17 Microsurgery in Ophthalmology . . . . .	407
I. Glaucoma Surgery . . . . .	407
A. Goniotomy . . . . .	408
B. Smith's Method of Trabeculotomy . . . . .	410
C. Allen and Burian's Method (1962) of Trabeculotomy . . . . .	411
D. Externalization of Schlemm's Canal (Sinusotomy) . . . . .	414
E. Trabeculectomy . . . . .	416

II. Cataract Surgery . . . . .	418
A. Aspiration . . . . .	418
B. Phacoemulsification . . . . .	421
III. Vitrectomy . . . . .	424
A. Indications . . . . .	424
B. Instruments . . . . .	424
C. Operative Procedure . . . . .	426
D. Complications . . . . .	427
IV. Eye Injury . . . . .	427
A. Corneal Laceration . . . . .	427
B. Corneoscleral Laceration . . . . .	429
C. Dislocated Lens . . . . .	429
D. Lens Luxation in Children . . . . .	430
E. Iridodialysis . . . . .	430
 Chapter 18 Application of Microsurgical Techniques in Urological Surgery . . . . .	432
