

MICROVASCULAR BONE RECONSTRUCTION

Edited by
Michael B Wood
Alain Gilbert

MARTIN DUNITZ

Contents

List of contributors	vii
Preface	ix
Dedication	x
I GENERAL CONSIDERATIONS: STRUCTURE AND FUNCTION	1
1 Anatomy of bone	3
2 Epiphyseal plate: anatomy and growth <i>Luc Téot</i>	7
3 Bone blood flow <i>Timothy R C Davis and Michael B Wood</i>	13
4 The control of bone blood flow <i>Peter J Briggs</i>	18
II NORMAL BONE HEALING MECHANISMS	27
5 Fracture union	29
6 Bone autograft incorporation <i>Christopher G Moran and Michael B Wood</i>	33
7 Vascularized autograft healing <i>Christopher G Moran and Michael B Wood</i>	37
8 Bone allografts <i>Christopher G Moran and Michael B Wood</i>	41
III MICROVASCULAR BONE TRANSFER: EXPERIMENTAL	45
9 Laboratory basis <i>Christopher G Moran and Michael B Wood</i>	47
IV MICROVASCULAR BONE TRANSFER: CLINICAL	53
10 Surgical techniques: donor sites	55
A. Iliac crest osteocutaneous flap: deep circumflex iliac artery	55
B. Iliac crest bone flap: deep circumflex iliac artery	61

C. Iliac crest osteocutaneous flap: superficial circumflex iliac artery	61
D. Fibular transfer	64
E. Upper tibial corticoperiosteal flap	79
F. Second metatarsal osteocutaneous flap <i>Jamal Gousheh</i>	83
G. Vascularized joint transfers	83
H. Chondroepiphysis in children <i>Luc T��ot</i>	85
I. Vascularized periosteal flap <i>Alain C Masquelet and Marie Claude Rom����</i>	89
11 Surgical techniques: recipient sites and mandibular reconstruction	109
A. Tibia	109
B. Femur	114
C. Femoral head	119
D. Pelvis/spine	120
E. Forearm	121
F. Humerus	122
G. Clavicle	125
H. Mandibular reconstruction <i>Bruno Coessens</i>	125
12 Flap selection for mandibular reconstruction <i>Bruno Coessens</i>	127
13 Bone fixation	131
14 Postoperative monitoring	139
15 Indications and results	143
A. Vascularized bone transfer vs other techniques	143
B. Congenital pseudarthrosis of the leg	146
C. Congenital pseudarthrosis of the forearm	159
D. Traumatic bone loss	159
E. Bone tumor resection	160
F. Chronic osteomyelitis	160
G. Femoral head osteonecrosis	161
H. Growth arrest hypoplasia <i>Luc T��ot</i>	169
I. Growth plate transplantation	171
16 Complications	179
Bibliography	181
Index	207
