

Plastic Surgery of the Hand and Pulp

Second Edition

Raymond Vilain, M.D.

Jacques Michon, M.D.

CONTENTS

Preface—J. W. Littler	v
Introduction	1
1 General Rules in Surgery of the Integumentary System of the Hand	3
Instruments	3
Suture Material	3
The Operative Position	4
Skin Preparation	4
Operative Regulations in Surgery Comprising Several Fields with Unequal Septic Conditions	6
Anesthesia	8
Obtaining an Avascularized Field	10
Postoperative Ischemias	12
Postoperative Dressing	13
Postoperative Complications: Ischemic Digital Necrosis	14
2 Wound Healing	17
Spontaneous Wound Healing	17
Healing by Second Intention	19
Directed Wound Healing	21
3 Surgical Techniques	25
Approaches	25
Sutures	29
Repositioning of Incomplete Degloving Injuries	30
Grafts	30
Special Techniques	35
Flaps	38
Different Types of Flaps	43
One-Stage Local Flaps	49
Cheiroplasty	58
Two-Stage Local Flaps	60
Distant Flaps	60
4 Wounds and Traumatisms	72
Agents	72
Therapeutic Rules	72
Delay of Surgery	73

	Immediate Psychological Approach	73
	Punctures	74
	Foreign Bodies	74
	Dermabrasions	74
	Lacerations	74
	Incomplete Degloving Injuries	76
	Lesions Following an Explosion	76
	Injection of Fluids under Pressure	82
	Amputations	82
5	The Pulp	83
	Anatomy	83
	Biomechanics	86
	Physiological Structure Permitting Recognition	86
	Conclusion	91
6	Fingertip Injuries	92
	Recent Fingertip Injuries	92
	Cuts	93
	Lacerations	94
	Contusions and Necroses	94
	Pulpal Crush Injuries	94
	Loss of Substance	94
	Secondary Pulpal Surgery	100
	Diagnosis	105
	Indications and Techniques	105
7	Ungual Lesions	117
	Recent Lesions	117
	Old Lesions	121
	Lesions of the Volar Aspect of the Fingers	125
	Lesions of the Lateral Aspect of the Fingers	127
	Total Degloving of One or Several Fingers	131
	Lesions of Dorsal Aspects of the Fingers	132
	Lesions of Commissurae	136
	Lesions of Dorsal Aspect of the Hand	151
	Lesions of Volar Aspect of the Hand	156
	Amputations	156
	Bibliography	171
	Index	173
