

A microscopic image of a nerve cross-section, showing various cellular structures and fibers in shades of purple and brown. The image is used as a background for the book cover.

POSTTRAUMATIC PERIPHERAL NERVE REGENERATION

Experimental
Basis and Clinical
Implications

EDITORS:

Alfredo Gorio
Hanno Milleli
Salvatore Mingrino

RAVEN PRESS

Contents

I: Nerve Cell Response

- 3 The Regeneration Program of the Neuron: An Introduction
Georg W. Kreutzberg
- 7 The Central Cell Body and Axonal Regeneration
Thomas B. Ducker
- 13 Optimal Time for Nerve Repair
G. Brunelli
- 17 The Axon Reaction of Central and Peripheral Mammalian Neurons: A Comparison
Kevin D. Barron, M. P. Dentinger, and L. D. Rodichok
- 27 Retrograde Signaling of Nerve Cell Body Response to Trauma
Krister Kristensson
- 35 Changes in Axonal Transport in Relation to the Nerve Cell Body Response During Peripheral Nerve Regeneration
M. Frizell and J. Sjöstrand
- 45 Discussion
- 49 Acceleration of Axonal Regeneration in Rat Somatic Motoneurons by Using a Conditioning Lesion
Irvine G. McQuarrie
- 59 The Central Nervous System Regeneration Problem: Neuron and Environment
Raymond J. Lasek, Irvine G. McQuarrie, and Jerome R. Wujek
- 71 Discussion

II: Proximal Segment of the Nerve

- 77 Introduction
A. Hudson
- 79 Problems of Circulation
G. Lundborg
- 81 Effects of Tension on Intraneural Microcirculation in End-to-End Neurorrhaphy
Yoshiro Miyamoto and Kenya Tsuge
- 93 Mechanisms of Nerve Sprouting

- 105 Contributions of Tissue Culture Studies to Our Understanding of Basic Processes in Peripheral Nerve Regeneration
Richard P. Bunge
- 115 Regeneration of Nerves in Relation to Axoplasmic Transport: An Analysis
Sidney Ochs
- 129 Aberrant Nerve Regeneration

IIIA: Site of the Lesion: Lesion in Continuity

- 139 Nerve Lesions in Continuity
Henry Nigst
- 147 Some Aberrations of Nerve Repair
José Ochoa
- 157 Mechanical Effects on Circulation and Nerve Function
Göran Lundborg
- 159 Short Term Effects of Anoxia
S. Ochs
- 161 Discussion
- 163 Some Aspects of Cell Biology
R. P. Bunge
- 165 Myelinated and Unmyelinated Nerve Fibers
A. J. Aguayo
- 167 Axonal Versus Demyelinating Injury: Are There Clinical and Electrophysiological Criteria?
Mark Mumenthaler
- 175 Neuropathology and Neurophysiology of the Lesion Incontinuity
D. G. Kline and A. R. Hudson
- 183 Morphological and Physiological Alterations Following Internal Neurolysis of Normal Rat Sciatic Nerve
F. Gentili, A. R. Hudson, D. G. Kline, and D. Hunter
- 197 Internal Neurolysis
H. Millesi
- 209 Discussion

IIIB: Site of the Lesion: Lesion with Interruption End-to-End Coaptation

- 213 Introduction
J. Michon

- 215 Neurorrhaphy
- 229 Nerve Lesions with Interruption of Continuity: Studies on the Growth Pattern of Regenerating Axons in the Gap Between the Proximal and Distal Nerve Ends
G. Lundborg and H. A. Hansson
- 241 Discussions
- 241 How Large Can a Gap Be Without Prohibiting Spontaneous Recovery?
- 243 Is There Anything Like Chemotaxis?
- 247 Crossing of the Gap by Axon Sprouts
- 251 What Kind of Tissue Fills up the Gap Between the Two Nerve Ends?
- 253 Results of Exposing Injured Nerves to a Pulsed Radiofrequency Field
David H. Wilson
- 259 Discussion
- 259 Collagen and Scar Tissue Formation
- 262 Maturation of Nerve Fibres After Crossing of the Axons
- 271 Statistical Analysis on Spatial Pattern of Transected Peripheral Nerve Regeneration
Yoshiro Miyamoto, Seizaburo Arita, Yoshimi Hori, and Hiroko Miyamoto
- 277 Consequences of Tension at the Suture Site
H. Millesi and G. Meissl
- 281 End-to-End Coaptation Under Tension on Repair of Peripheral Nerves
Yoshiro Miyamoto
- 287 Clinical and Experimental Reflections on the Lesion with Interruption Without Serious Gap
D. G. Kline, A. R. Hudson, E. R. Hackett, and B. R. Bratton
- 297 Discussion
- 301 How Exact Should a Coaptation Be?
H. Millesi
- 305 Discussion
- IIIC: Site of the Lesion: Grafting**
- 309 Introduction to the Problems Connected with Nerve Grafting
H. Millesi
- 313 Basic Experimental Studies on Nerve Grafting
A. J. Aguayo
- 316 Discussion

- 319 Schwann Cell Survival in Auto-, Allo-, and Xenografts
A.J. Aguayo
- 322 Discussion
- 324 Discussion: Does the Graft Survive or Does It Become Fibrotic?
- 325 Different Techniques of Nerve Grafting
H. Millesi
- 328 Discussion
- 329 Nerve Grafting Time Series and Length Series Analysis of Regenerated Myelinated Fibers
Yoshihiro Miyamoto, Hiroko Miyamoto, and Seizaburo Arita
- 337 Graft Preparation: Sural Nerve Withdrawal
G. Brunelli
- 339 Use of Grafts to Repair Nerves with Serious Gaps
D.G. Kline, A.R. Hudson, and B.R. Bratton
- 343 Discussion
- 345 The Problem of Two Sites of Coaptation in Nerve Grafting and the Defect-Distance Relation
H. Millesi
- 347 Discussion: Nerve Graft—The Distal Site of Coaptation
- 351 Grafting Versus End-to-End Coaptation of Nerves
Yoshihiro Miyamoto and Kenya Tsuge
- 357 Discussion
- 361 The Xenographic Graft Model
A.J. Aguayo
- 363 Discussion
- 365 Construction of Graft
A.J. Aguayo
- 366 Construction of Graft
R.P. Bunge
- 367 Discussion
- 368 Discussion: The Use of Fresh or Preserved Allografts
- 369 Trophic and Nontrophic Regulation of Skeletal Muscle and Regeneration in the Central Nervous System
Edson X. Albuquerque, Sharad S. Deshpande, Lloyd Guth, and Jordon E. Warnick

- 397 Centrally Cut Axons Regenerate in Peripheral Nerve Implanted in Murine Brain: Immunofluorescence Study with Neurofilament and GFA Antisera

Amico Bignami, Nguyen H. Chi, and Doris Dahl

- 403 Neurophysiological Evidence of Function in Peripheral Nerve Grafts in the Spinal Cord

David H. Wilson

- 405 Discussion

IV: Distal Segment of the Nerve

- 411 Control of Schwann Cell Behavior During Nerve Degeneration and Regeneration

Peter S. Spencer, M. J. Politis, R. G. Pellegrino, and H. J. Weinberg

- 427 Discussion

- 431 Is It Possible to Avoid Wallerian Degeneration? Experimental Study and Practical Consequences?

G. Brunelli

- 433 Experimental Data and Practical Results Which Modify Concepts of Peripheral Nerve Fibres Regeneration

Eros A. Erhart

- 441 Discussion

- 445 Function of the Regenerating Distal Segment of Nerve

D. G. Kline, E. R. Hackett, and L. R. Happel

VA: Distal Endings: Muscle End Plates

- 453 The Use of Acetylcholinesterase Molecular Forms to Appraise Post-Traumatic Recovery of Nerve and Muscle

L. Di Giamberardino, J. Y. Couraud, R. Hassig, P. Marini, and A. Gorio

- 459 Electrical Stimulation of Denervated Muscle

J. Bergmans and R. Senden

- 469 Electric Stimulation of Denervated Skeletal Muscles

Eiji Hatano, Kenya Tsuge, Yoshikazu Ikuta, Kaoru Yoshioka, and Nobuo Hiramatsu

- 479 Discussion

- 481 Reformation, Maturation, and Stabilization of Neuromuscular Junctions in Peripheral Nerve Regeneration: The Possible Role of Exogenous Gangliosides on Determining Motoneuron Sprouting

A. Gorio and G. Carmignoto

- 369 Trophic and Nontrophic Regulation of Skeletal Muscle and Regeneration
in the Central Nervous System (*See Section IIIC*)
E. X. Albuquerque
- 493 Discussion
- 495 Experimental Reinnervation Attempts of Skeletal Muscle Cells by Non-
motor Nerves
George Karpati, Stirling Carpenter, and Louise Charron
- 507 Effects of Repeated Nerve Injuries on Muscle Histochemistry and Rein-
nervation in the Adult Rat
M. Pécot-Dechavassine, M. Fardeau, and J. C. Mira
- 515 Sprouting of the Intact Axon After Partial Denervation in an Amphibian
Muscle
C. Haimann, A. Mallart, J. Tomas i Ferré, and N. F. Zilber-Gachelin
- 521 Discussion
- 523 Direct Neurotisation of Denervated Muscles
G. Brunelli
- 527 Discussion

VB: Distal Endings: Sensitive Endings

- 533 The Recovery of Sensory Function in Skin After Peripheral Nerve Le-
sions
Jack Diamond
- 549 Cutaneous Sense Organs and the Role of Thin Fibers in Sensation, with
Particular Reference to Reinnervation
Lawrence Kruger
- 563 The Fate of Pacinian Corpuscles After Denervation and Reinnervation
Jiřina Zelená
- 573 Discussion
- 577 Sensory Examination in Man
S. Mingrino
- 581 Electromyography and Microneurography Following Peripheral Nerve
Transplantations
A. Struppler, R. Mackel, U. A. Besinger, and F. Waldhör
- 591 Patterns of Cutaneous Innervation and Reinnervation Following Nerve
Transection
Julia K. Terzis

- 611 Gnostic Rings for Quantifying Sensitive Regeneration
G. Brunelli
- 613 Discussion
- 615 Pain After Peripheral Nerve Injury
S. Mingrino
- 617 Discussion

VI: Conclusions

- 621 Concluding Remarks
T. A. Lamba
- 623 Conclusions: Basic Science
Alfredo Gorio
- 625 Conclusions: Clinical Science
H. Millese
