Preface vii

Introduction viii

Part I General considerations

1 Historical aspects
Antonio Landi, Maria C Facchini, Antonio
Saracino and Giuseppe Caserta 3

2 Functional assessment
Peter C Amadio 13

Part II Thumb mutilation

3 Progressive lengthening
Ivan Matev 23

4 Pollicization
Paul Binhammer and Graham Lister 29

5 Considerations concerning pollicization
Yves Allieu, Michel Chammas and Jean Luc
Roux 41

6 Osteoplastic reconstruction
Raoul Tubiana 53

7 Free vascularized toe transfer
Guy Foucher and Paul Binhammer 57

8 Indications in secondary reconstruction of
the thumb
Guy Foucher and David J Smith Jr 67

Part III Unidigital mutilation

9 The stump and amputation
Arielle Salon and Julian Glicenstein 77

10 Phantom hand and stump pain
Jean-Marie Farcot 87

11 Transposition by intracarpal osteotomy
Dominique T Le Viet and Laurent A Lantieri 95

12 Lengthening by toe transfer
Gregory M Buncke 101

Part IV Multidigital mutilation

13 The metacarpal hand
Dieter Buck-Gramcko 109

14 Indications for reconstruction in finger
mutilations
Guy Foucher and Roger Blauvelt 121

Part V Other aspects

15 Secondary reconstruction in children
Luis R Scheker and Russell A Shatford 135

16 Psychological aspects
Annie Didierjean 151

17 Job retraining
Jacques Xénard and Didier Pétry 155

18 Functional prostheses
Solange Ehrler and Serge Coulon 163

19 Aesthetic prostheses
Jean Pillet 169
