

Reconstructive Microsurgery

Bernard McC O'Brien CMG

BSc, MD(Melb), MS(Melb), FRCS(Eng), FRACS, FACS,
FRCSEd(Hon), FRCSI(Hon)

Director of Microsurgery Research Centre, St Vincent's Hospital,
Melbourne

Plastic Surgeon, St Vincent's Hospital, Melbourne

Professorial Associate, Department of Anatomy, University of
Melbourne

Consultant Plastic Surgeon, Mercy Maternity Hospital, University of
Melbourne

Wayne A Morrison

MB, BS(Melb), FRACS

Deputy Director, Microsurgery Research Centre, St Vincent's Hospital,
Melbourne

Assistant Plastic Surgeon, St Vincent's Hospital, Melbourne

Associate, Department of Surgery, University of Melbourne

St Vincent's Hospital

Plastic Surgeon, Repatriation Hospital, Heidelberg, Melbourne

Consultant Plastic Surgeon, Geelong Hospital, Victoria

CHURCHILL LIVINGSTONE

EDINBURGH LONDON MELBOURNE AND NEW YORK 1987

Contents

Section One Equipment and unit organization

- 1. The operating microscope 3
- 2. Micro-instrumentation and microsutures 12
- 3. The organization of a Microsurgery Unit 20

Section Two Microvascular technique

- 4. End-to-end anastomosis 31
- 5. End-to-side anastomosis 52
- 6. Grafts 56

Section Three Physiology and pathology of small blood vessels

- 7. Normal blood flow
G J Gumley 65
- 8. Abnormal blood flow
G J Gumley 74
- 9. Ultrastructural microvascular repair
G M Mitchell 89
- 10. Scanning electron microscopy
G Nightingale

Section Four Anaesthesia

- 11. Anaesthesia in microvascular surgery
V Stanisch & H C Butel 129

Section Five Microneural surgery

- 12. Anatomy, physiology and response to nerve injury 137
- 13. Factors influencing results of nerve repair 140
- 14. Microsurgical techniques of nerve repair 145
- 15. Neurolysis and neurotization 152
- 16. Nerve grafts 155
- 17. Assessment of results — nerve repair and grafts 160
- 18. Brachial plexus
In collaboration with G J Gumley 164

Section Six Replantation surgery

- 19. Limb replantation 179
- 20. Digital replantation 196
- 21. Miscellaneous tissue replantation 216

Section Seven Free tissue transfer — donor tissues

- 22. General aspects 225
- 23. Free flaps — head and neck 235
- 24. Free flaps including muscle — trunk 241
- 25. Free flaps — upper limb 259
- 26. Free flaps including muscle — lower limb (excluding foot) 270
- 27. Free flaps and vascularized tendons — foot 285
- 28. Toe transfer (total and segmental) 294
- 29. Abdominal cavity
In collaboration with T Y Shen 309
- 30. Vascularized bone grafts 315

114 Section Eight Microsurgical reconstruction of the upper limb

- 31. Vascular reconstruction 327
- 32. Skin, pulp and nail reconstruction 330
- 33. Tendon, muscle and nerve reconstruction 341
- 34. Bone reconstruction 351
- 35. Thumb reconstruction 356
- 36. Finger and metacarpal hand reconstruction 370
- 37. Small joint reconstruction 381

Section Nine Microsurgical reconstruction of the lower limb

- 38. Cutaneous reconstruction including sole 391
- 39. Osteocutaneous reconstruction 412
- 40. Bone reconstruction 422
- 41. Muscle reconstruction 428

Section Ten Microsurgical reconstruction of the trunk		Section Twelve Microsurgery of the lymphatic system	
42. Cutaneous, composite trunk wall and breast reconstruction	435	47. Microlymphatic surgery	485
Section Eleven Microsurgical reconstruction of the head and neck		Section Thirteen Microsurgery of the urogenital system	
43. Skin including scalp and subcutaneous tissue	443	48. Vas deferens and epididymis	509
44. Oral cavity and pharynx	455	49. Fallopian tube and ovary	513
45. Jaw reconstruction	463	50. Testicular transfer	523
46. Facial palsy	472	Index	533
