1973

CONTENTS

PART ONE

GENERAL

PAGES

3-14

CHAPTER I THE SOCIAL SIGNIFICANCE OF HAND INJURIES

Incidence of hand injuries and how they occur 3. Economic considerations of hand injuries 9. Personal and individual aspects of hand injury 14. Medical responsibility concerning hand injuries 14.

CHAPTER II SURGICAL ANATOMY OF THE HAND . . . 15-59

Posture of the hand 16. The skin 17. The nails 19. Subcutaneous tissue and fascia 21. The blood-vessels 22. The nerves 24. Anastomotic branches and their significance 32. The blood supply of nerve trunks 32. The tendons 34: Flexor system 34; Extensor system 39; The actions of the extensor tendons 43. Intratendinous architecture 47. The joints 49. "Skin joints" of the hand 53. Hand types and normal variations 53. Hand function 55.

CHAPTER III ORGANISATION IN RELATION TO HAND INJURIES 60-68

General considerations of organisation 60: 1. The overwhelming importance of primary treatment 61; 2. Continuity of management and responsibility 61. First-aid instructions 63. Casualty reception and management 64. Definitive hand surgery in casualty departments 64. Operating theatre arrangements 65.

CHAPTER IV THE EXAMINATION AND APPRAISAL OF A RECENTLY INJURED HAND . . . 69-80

The nature and circumstances of the injury 69. The viewpoint of the patient 70. The clinical examination of the injured hand 70: General factors and limitations 70; Tests of tendon function 72; Tests of nerve function 76; Patterns of associated nerve and tendon injuries at the wrist 77; Tests for bony injury 77; Some common mistakes 78. The consultation 79.

PART TWO

PRIMARY TREATMENT

INTRODUCTION TO PART TWO . . . 82

CHAPTER V GENERAL CONSIDERATIONS OF PRIMARY TREATMENT FOR OPEN HAND INJURIES . . . 83-115

Anaesthesia 83. Cleansing 91. Final assessment of damage 92. Delayed primary closure 94. Choice of procedure 94: The "tidy" hand injury 96; The "untidy" hand injury 96. The use of a tourniquet 99. Haemostasis 100. Primary dressings at operation 101. Immobilisation 103. Antibiotics 106. Antisera 107. After-treatment of primary repair procedures 108. Transition from immobilisation to active function 109. Artefact lesions and "functional" disorders 111. Short muscle contracture 115.

CONTENTS

PAGES

CHAPTER VI METHODS OF WOUND CLOSURE AS APPLIED TO THE HAND 116-137

Suturing of wounds without appreciable skin loss 117. Primary skin grafting for skin loss 120. Local flaps for wounds with minor skin loss 120. Grafting of wounds with major skin loss 128. Closure of traumatic amputations 133.

CHAPTER VII TIDY HAND WOUNDS AND THEIR COMMON SUB-TYPES 138-168

The simple uncomplicated skin cut 138. Slicing injuries with soft tissue loss 138. Guillotine amputations 145. Incised wounds involving severed tendons and/or nerves 149. Tendon and nerve injuries on the palmar surface of the hand 150. Tendon injuries on the dorsum of the hand and fingers 157. Some aspects of technique in nerve and tendon repair 163. After-treatment of repaired tendons and nerves 165.

CHAPTER VIII UNTIDY WOUNDS AND THEIR COMMON SUB-TYPES 169-195

The crushed or pulped finger tip 169. Mangled fingers 171. Deep wounds of the palmar region 177. Flap avulsions and degloving injuries 178. Compression injuries of the hand 183. High-explosive injuries 188. Gunshot wounds of the hand 189. Some less common injuries 192.

PART THREE

INTERMEDIATE TREATMENT

INTRODUCTION TO PART THREE 198

CHAPTER IX UNHEALED WOUNDS OF THE HAND 199-204

Recent unclosed wounds 199. Massive tissue necrosis 200. Exposure necrosis 201. Granulating wounds 202. Septic complications 203.

CHAPTER X RE-ESTABLISHMENT OF JOINT MOBILITY 205-211

Surgical correction of posture deformities 209. Capsulotomy and Capsulectomy 209.

PART FOUR

SECONDARY TREATMENT OF HAND INJURIES

INTRODUCTION TO PART FOUR 214

CHAPTER XI GENERAL CONSIDERATIONS OF SECONDARY TREATMENT 215-222

Review of the healed hand 215. The physical state of the hand 215. The efficiency of the hand 219. Trial of function 221. Records and reports 222.

CONTENTS

	PAGES
CHAPTER XII SCAR DISABILITIES OF THE HAND	223-237
The indications for scar replacement 226. The time for scar replacement 226. The method of scar replacement 226: Replacement of uncomplicated scars 228; Replacement of complicated scars 231.	
CHAPTER XIII SECONDARY REPAIR OF DEEP STRUCTURES	238-293
Flexor tendons 238: Early secondary repair 238; Delayed secondary repair 241; Complicated secondary repair 242; Failed tendon repair 244. Some special features of secondary management of tendon injury 246: Flexor tendon grafting 246; Silastic rod insertion 260; Cadaver homografts of the flexor system 261; The use of tendon substitutes 263; Tenodesis for terminal joint stability 263. Extensor tendons 265. Nerves 274; Irreparable nerve injuries and failed nerve repairs 280. Bones and joints 291.	
CHAPTER XIV UNSATISFACTORY AMPUTATION STUMPS AND ELECTIVE RE-AMPUTATIONS	294-303
Sites of election 301. Technique of elective amputations 302.	
CHAPTER XV RECONSTRUCTIVE PROCEDURES FOR MUTILATING INJURIES	304-324
Local rearrangement of hand remnants 305. Reconstruction of the thumb 309. Reconstruction of apposition post 317. Reconstruction of paired apposition posts 317. Prosthesis 324.	

PART FIVE

SPECIAL ASPECTS OF HAND INJURY

CHAPTER XVI THE BURNT HAND	327-354
Two main types of burnt hand 327. Prognosis of a burnt hand 329. Diagnosis of the depth of the burn 329. Treatment of a burnt hand 330. First aid and casualty treatment 330; Primary treatment 331; superficial burns and burns of dubious depth 331; Deep burns (complete skin destruction) 332; Chemical burns 335; Electrical burns 335; Delayed treatment of burnt areas 337. Secondary reparative surgery of the burnt hand 341. The common burn scar disabilities 341.	
CHAPTER XVII HAND INJURIES IN CHILDREN	355-366
Healing time and the behaviour of scar 355. Capacity for remodelling and differentiating tissues 356. The behaviour of grafted tissue during growth 359. Interference with juxta-epiphyseal growth 360. Difficulties of diagnosis 361. Immobilisation 362. Technical difficulties in repair 363. Care of dressings and removal of sutures 364. Intermediate treatment and physiotherapy 364. Recovery and re-education 366.	
CHAPTER XVIII HAND PROSTHESIS	367-374
Cineplasty 367; Biceps cineplasty 370. Amputation in relation to hand prosthesis 373.	
CHAPTER XIX THE AFTERMATH OF HAND INJURIES	375-380
Assessment of disability 375; The objective result 375; The subjective result 377; The legal aftermath of injury 379. Assessment of damages 380.	
INDEX	383-390
