

Surgical Disorders of the Shoulder

Edited by

MICHAEL S. WATSON

Churchill Livingstone 

Contents

SECTION 1

Principles

1. Anatomy and biomechanics of the shoulder 3
J. Pegington
2. Examination of the shoulder: signs and approaches 29
M. S. Watson
3. Assessment of the shoulder 39
C. R. Constant
4. Anaesthesia 47
J. G. Diamond
5. Rehabilitation after injuries and surgery of the shoulder 53
G. Rompe, B. Fromm

SECTION 2

Investigation

6. Radiography 73
D. Horsfield
7. Arthrography 97
P. Renton
8. Intra-articular pressure measurement 119
M. Takeshita, N. Takagishi, Y. Shibata
9. Double contrast CT arthrography and shoulder instability 129
D. S. Morrison, L. U. Bigliani
10. Ultrasonography of the rotator cuff 135
E. Craig
11. Arthroscopy of the shoulder and the subacromial bursa 157
A. M. Wiley

SECTION 3

Inflammatory disorders

12. Frozen shoulder 167
B. L. Hazelman
13. Acute shoulder inflammation and crystal-associated diseases 181
T. Gibson
14. Pathology of the rheumatoid shoulder 195
J. F. Crossan
15. Management of chronic inflammatory arthropathy 203
D. O. Haskard, R. Grahame
16. General principles in the treatment of rheumatoid arthritis 217
N. Gschwend
17. Infection 223
A. Kawashima, M. Mikasa

SECTION 4

Rotator cuff disorders

18. Impingement syndrome: aetiology and overview 237
L. U. Bigliani
19. Ageing process of the supraspinatus tendon with reference to rotator cuff tears 247
K. Yamanaka, H. Fukuda
20. Pathology of rotator cuff tendons 259
H. K. Uthoff, K. Sarkar
21. Surgical treatment of rotator cuff impingement 271
J. Thorling, L. Hovelius
22. Surgical treatment of rotator cuff rupture 283
H. Ellman
23. The role of muscle advancement in the surgical treatment of cuff rupture 293
D. Patte

24. Arthroscopic treatment of the rotator cuff 309
G. H. Dericks

SECTION 5

Glenohumeral instability

25. Differentiation between traumatic and atraumatic shoulder dislocation and instability 325
K. Mizuno
26. Operations for a recurrent dislocation: overview 339
B. Fleega
27. The use of coracoid transfer for recurrent anterior glenohumeral instability 355
D. F. Gazielly
28. The modified Oudard-Iwahara operation 363
R. Yamamoto
29. The Putti-Platt procedure 379
P. P. Symeonides
30. Juxta-articular osteotomy for recurrent dislocation 387
A. Pfister
31. Recurrent subluxation of the shoulder 395
W. Burkhead
32. Glenoid osteotomy for loose shoulder 425
K. Nobuhara, H. Ikeda
33. Capsular reefing for multidirectional instability 433
P. Welsh, N. P. Trimmings

SECTION 6

Arthrodesis and arthroplasty

34. Shoulder arthrodesis: indications and techniques 443
R. R. Richards, J. P. Kostuik
35. Shoulder arthroplasty: principles 459
J. J. Brems, A. H. Wilde
36. Unconstrained prosthetic shoulder replacement 473
T. R. Norris
37. Constrained total shoulder arthroplasty 511
R. Wallenstein

SECTION 7

Injuries

38. Clavicular fractures and sternoclavicular dislocations 521
D. H. Sonnabend
39. Management of proximal humeral fractures 531
B. J. Lundberg
40. Neer hemiarthroplasty in the treatment of complex proximal humeral fractures 547
J. E. Des Marchais, G. Maurais
41. Acromioclavicular injuries 555
F. Kato
42. Fractures of the scapula 563
R. Ideberg, R. Myrhage
43. Persistent dislocations 575
T. H. Meadows
44. Disorders of the shoulder in sport 589
D. Yanni

SECTION 8

Stiffness and weakness

45. Orthoses for shoulder disabilities 597
J. Patrick
46. Thoracoscopic weakness 605
S. Copeland
47. Neurological disorders of the shoulder: spastic shoulder — causes and treatment 611
B. Roper
48. Electrophysiological diagnosis of neural injuries 617
W. Trojaborg
49. Nerve grafting for shoulder weakness 627
Y. Nakatsuchi

SECTION 9

Malignant disease

50. Tumours 647
M. S. Watson
