

Surgical Disorders
of the
PERIPHERAL
NERVES

R. BIRCH
G. BONNEY
C. B. WYNN PARRY

Contents

Introduction vii

Plate Section after page xi

1. The peripheral nervous system 1
2. The microscopic structure of the nervous system 17
3. The motor and sensory pathways 27
4. Reactions to injury 37
5. Regeneration 57
6. Clinical aspects of nerve injury 71
7. Operating on peripheral nerves 87
8. Compound nerve injury 123
9. Traumatic lesions of the brachial plexus 157
10. Birth lesions of the brachial plexus 209
11. Results 235
12. Entrapment neuropathy 245
13. Iatrogenic injury 293
14. The peripheral nervous system and neoplastic disease 335
15. Pain 373
16. Recovery of sensibility after nerve repair 405
17. Reconstruction 415
18. Rehabilitation 451
19. Electrodagnosis 467
