# **TENDON TRANSFERS TO RESTORE OPPOSITION OF THE THUMB**

# CONTENTS

## INTRODUCTION / ix

### I. FUNCTIONAL ANATOMY OF THE THUMB / 1

- Movements in the carpo-metacarpal joint / 1
- Movements in the metacarpo-phalangeal joint / 5
- Movements in the interphalangeal joint / 6
- Function of the intrinsic muscles / 6
- Function of the extrinsic muscles / 9
- Nerve supply of the intrinsic muscles / 12

### II. FUNCTIONAL LOSS IN PARALYSIS OF INTRINSIC THUMB MUSCLES / 15

- Paralysis of radial thenar muscles / 15
- Paralysis of ulnar thenar muscles / 16
- Paralysis of radial and ulnar thenar muscles / 17
- Prognosis of median and ulnar nerve lesions / 19

### III. RECONSTRUCTION OF THE OPPOSITION / 21

- Indications / 21
- Prerequisites / 22
- Historical background / 24
- Methods / 25

muscle transfers; tendon transfers: transfer of the flexor pollicis longus tendon; transfer of the abductor pollicis longus tendon; transfer of the extensor pollicis brevis tendon; transfer of an extensor tendon of a finger; transfer of the tendon of a wrist extensor; transfer of the palmaris longus tendon; transfer of a flexor digitorum superficialis tendon; transfer of a flexor digitorum profundus tendon.

- The insertion / 33

The pulley / 35

The motor / 38

availability; dispensability; power and amplitude;  
synergism; empirical findings; presence of scar tissue;  
multiple motors.

Opposition by means of arthrodesis or tenodesis / 49

Supplementary corrections / 50

#### IV. DISCUSSION OF SELECTED OPPOSITION RECONSTRUCTIONS / 52

CONCLUSIONS / 81

SUMMARY / 83

LITERATURE / 85
