

HAND AND UPPER LIMB

1

THE INTERPHALANGEAL JOINTS

Edited by William H. Bowers

Foreword by Lee W. Milford Jr

CHURCHILL LIVINGSTONE

Contents

SECTION 1. Anatomy 1

1. The anatomy of the interphalangeal joints 2
W. H. Bowers
2. Surgical and functional anatomy 14
J. W. Littler and J. S. Thompson
3. The biomechanics of the interphalangeal joints 21
P. W. Brand, D. E. Thompson and J. E. Micks

SECTION 2. Repair and Reconstruction of Injury 55

4. Injuries and complications of injuries to the capsular structure of the interphalangeal joints 56
W. H. Bowers
5. Intra-articular fractures and fracture-dislocations 77
N. J. Barton
6. Extensor surface injuries at the proximal interphalangeal joint 94
E. A. Rosenthal
7. Acute and chronic flexor and extensor mechanism injuries at the distal joint 111
R. Honner

SECTION 3. Arthritis and Arthrosis: Reconstruction 119

8. Rheumatoid and related arthritides of the interphalangeal joints 120
J. E. Imbriglia

9. Degenerative arthritis and allied conditions involving the interphalangeal joints 142
Dean S. Louis
10. Interphalangeal joint arthroplasties 156
J. S. Thompson
11. Techniques of interphalangeal arthrodesis 174
G. Hooper

SECTION 4. Congenital and Developmental Conditions 187

12. Congenital and developmental conditions 188
D. Buck-Gramcko
13. Developmental conditions 203
J. P. W. Varian

SECTION 5. Rehabilitation 211

14. Therapeutic management of the proximal interphalangeal joint 212
M. S. Carter
15. Splinting the interphalangeal joints 252
S. Harkins Torkelson
16. The art of joint mobilization: the restoration of joint play 262
S. Bittinger
